📍 Kabupaten Kendal, Jawa Tengah

Summary

I am a Web and Android Developer with experience in MySQL databases, PHP, JavaScript, Java, and Kotlin, as well as the Laravel and Spring Boot frameworks and AWS Cloud. I am known as a hard-working individual who adapts easily to new environments and learns new technologies quickly.

Tech Stack

Languages:	Frameworks:	Database:	DevOps:	Architecture	Caching:
Kotlin, python	Laravel, Spring Boot, CodeIgniter,	MySQL,	Docker, Git	MVVM,	Redis
Java, go, rust	Astro, Nextjs, NuxtJs, Flutter,	Supabase,		MVC,	
JavaScript,	Jetpack Compose, Vue	Firebase		MVP	
typescript	Kotlin Multi Platform				

Work Experience

Freelance fullstack Developer dan owner • Latech

December 2025 - Present

- Directed end-to-end software development projects, including client acquisition, requirement analysis, and the creation of technical proposals, timelines, and budgets.
- Designed UI/UX via Figma and developed robust full-stack applications using Flutter, Kotlin, Java, React, JavaScript, TypeScript, Vue, Next.js, Nuxt.js, Node.js, and MySQL/PostgreSQL, and another tech stack.
- Executed rigorous testing, deployed finalized projects with complete documentation, and provided post-launch technical support and maintenance.

Productive TKJ and coding Teacher • SMK Harapan Mulya Kendal

7/2025 - 11/2025

- Guided students in algorithmic thinking and problem-solving.
- Taught the use of Artificial Intelligence tools.
- Mentored students in basic website development using HTML, CSS, and JavaScript.
- Guided installation and configuration of wired and wireless networks using MikroTik devices.
- Provided instruction on computer hardware functions, installation, and maintenance.
- Taught efficient file-sharing and printer-sharing configurations.

Productive RPL Teacher • SMK Texmaco Semarang

3/2024 - 4/2025

- Guided students in IoT practicums using Tinkercad.
- Mentored students in basic website development using HTML, CSS, and JavaScript.
- Taught the implementation of the Laravel framework for structured web application development.
- Trained students in graphic design using Canva for creative and professional needs.
- Taught database concepts and implementation using MySQL, including design, management, and optimization.
- Guided the installation and configuration of wireless and wired computer networks using MikroTik devices.
- Provided lessons on computer hardware, including functionality, installation, and maintenance.
- Taught file-sharing techniques between devices and configuration of shared printing systems.

Software Developer • PT BANGUN NUSA NETWORK

6/2023 -10/2023

- Developed and integrated web front-end and back-end systems to deliver functional and responsive applications.
- Built user interfaces for Android applications with an emphasis on optimal user experience.
- Performed maintenance and updates on Android application source code to ensure quality and performance.

Intern Backend Developer • CV UMBRELLA CORPORATION

8/2021 - 1/2022

- Create a CRUD and authentication API using existing Spring Boot technology

Education

Bachelor of Applied Computer Science (S.Tr.Kom.) – Software Engineering. GPA 3,51.

11/2018 – 10/2023

Politeknik Balekambang Jepara

- Studied MySQL, PHP programming, game developing, and Android application development using Java and Kotlin.
